

A close-up photograph of a woman's hands plugging a charging cable into the port of a white electric vehicle. She is wearing a light pink, ribbed sweater. The background is a soft, out-of-focus outdoor setting with a warm, golden light, suggesting a sunset or sunrise. The overall mood is clean, modern, and sustainable.

ALPHABET

E-mobility

Use the full potential of e-mobility

Get to grips with the future of mobility today – with e-mobility

Changing mobility patterns and increasing urbanisation are calling conventional drive concepts into question and posing entirely new challenges to mobility. We are thinking ahead in terms of mobility and are offering a comprehensive solution for sustainable corporate mobility in the form of e-mobility. With e-mobility, we support you in all areas of e-mobility and guarantee the flexible integration of e-mobility into your existing fleet. From potential analysis, choosing the right vehicle and the appropriate charging infrastructure up to and including individually selected mobility services.

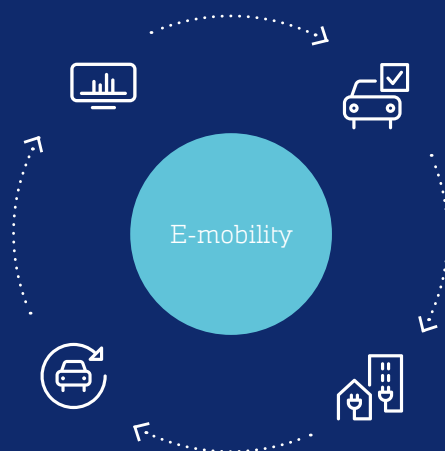

In just four steps, we will jointly determine your individual e-mobility solution and make e-mobility an efficient addition to your corporate fleet.

Fleet analysis

- E-mobility potential
- Route optimisation

Mobility services

- E-mobility solutions
- Driver service
- Full service leasing

Vehicle selection

- Appropriate vehicles

Charging solutions

- Charging infrastructure
- Strong cooperation partners

1 Fleet analysis

The best strategy for exploiting the full potential of e-mobility. A personal discussion.

Together, we will ascertain your e-mobility needs. Here, the area of use and the range determine the possible degree of electrification and your potential saving.

How you benefit

We provide you with a bespoke concept for the efficient, sustainable and cost-effective management of your e-mobility needs.

2 Vehicle selection

The question about the appropriate drive concept has a clear answer: the suitable electric vehicle.

For us, e-mobility isn't a matter of the vehicle brand, but of the drive concept. E-mobility only becomes an intelligent addition to your vehicle fleet when this technology is perfectly matched to your usage profile.

How you benefit

No matter what your requirements, we can offer you the right drive concept.

3 Charging solutions

A needs-based solution is determined from your individual requirements. A charging infrastructure that is always available.

The prerequisite for ensuring the smooth integration of e-mobility into your fleet is a charging infrastructure that is optimally coordinated with the vehicle and its use. A quick-charging station, for instance, enables you to continue driving after lunch, and a wall box takes care of overnight charging. Our in-depth advice from specialists and our wide range of charging solutions help you to make the right decision quickly and easily.

How you benefit

From selection and installation to commissioning of the charging solution, we support and accompany you throughout the entire process.

4 Mobility services

Individual services are transformed into an integrated product for 360-degree e-mobility. The modular mobility services.

Our modular mobility services offer you an extensive range of additional services for electric vehicles that can be individually combined. From the Alphabet app for smartphones and the 24-hour service hotline, from driver training courses to a rental car for longer business trips.

How you benefit

With mobility services that can be booked flexibly, we ensure the unproblematic use of all electric vehicles and the trouble-free operation of your vehicle fleet.

The question isn't whether e-mobility is coming, but when you intend to get going with it. We're ready. The comprehensive solution for your e-mobility.
